

ABSTRACT

The present invention relates to an animated gaming system and animated display system, comprising a housing, an animated figure and an animated element. The housing for the animated gaming system include having a symbol which represents a prize. The animated figure 5 has a three-dimensional form. The animated element is operatively coupled to the animated figure and is controlled by a control system which manages the operations of the animated figure. The control system includes one or more controlled outputs which are forced to change in a desired manner as time progresses.
